

Dear Sir / Madam,

We are able to introduce our concept and offer you a cooperation related to one of the most popular types of massage in the world - Maderotherapy.

Briefly, Maderotherapy was established in Colombia at the end of the 1990s and basically represents the application of wooden elements for therapeutic and aesthetic purposes in order to improve the general state of the organism - the quality of the skin, the muscle tone, the removal of pain, the formation of the body, the reduction of cellulite, the reduction of wrinkles, rejuvenation and tightening of the skin, improvement of lymphatic system, circulation, oxygenation, acceleration of metabolism ... Maderotherapy has a really wide application, but besides all benefits that can provide, its greatest advantages are efficiency, a significant reduction in the energy consumption of therapists during work in relation to other methods and is a completely natural and non-invasive method with a minimum of contraindications in use.

Maderotherapy Center is the first organization in Europe with a protected brand for Maderotherapy at the Institute for Intellectual Property that have introduced in its educational program the complete application of wooden elements for therapeutic and aesthetic purposes. We have been dealing with Maderotherapy for 5 years, and from 2015 we also have introduced trainings for the complete body with Maderotherapy:

- Maderotherapy of the body and anti-cellulite,
- Facial Maderotherapy,
- Antistress / Therapeutic / Relax method of Maderotherapy, respectively Madtherotherapy of the back, neck and shoulders.

For each of the above mentioned methods, a special set of wooden elements, specially made for a given application, is used.

The instructor team of Maderotherapy Center presents trained and experienced physiotherapists and beauticians with many years of experience in this business. The seriousness and professionalism of our Maderotherapy Training Center are best shown in our numerous presentations on the topic of Maderotherapy in relevant TV shows and written media, which can be viewed on our website www.maderotherapy.com, on our YouTube channel "Maderoterapija Centar" as well as on our social media sites: instagram - @maderoterapija_srbija, facebook - "Maderoterapija Centar".

Our training consists of theoretical and practical work.

1. The theoretical part covers the complete knowledge in the field of Maderotherapy and its history; anatomy and physiology of the body / face, of the skin and subcutaneous tissue of the body / face, protection and the protection positions of the therapist, the process of proper maintenance of the wooden elements and application, as well as hygiene during the work.

2. Practical part of the training consists of transferring knowledge from theory into practice, proper handling and technique of application, introduction and improvement of work with each element in particular to the smallest details important for the correct application of wooden elements, as well as all possible reactions of the clients to the application of Maderotherapy.

After successful completion of the training, each trainee receives:

- 1. A set of professionally created and anatomically-tailored elements for the given area*
- 2. Professional literature for each field in particular*
- 3. Certificate with our trademark protected at the Intellectual Property Office*
- 4. Free advertising on our website and the right to use the brand and trademark*
- 5. Support in further work and free consultation*
- 6. Possibility of expanding cooperation and discount for further training*

Currently, there are three types of application and training for Maderotherapy. Each one contains special literature, as well as a special set of elements:

With body / anti-cellulite Maderotherapy training, a set of 11 wooden elements is obtained.

With the facial Maderotherapy training, a set of 7 wooden elements is obtained.

With the Therapeutic / Antistress / Relax Maderotherapy training, a set of 7 wooden elements is obtained.

The minimum duration of the training is 12 school lessons, divided into two or more days, with the possibility of extension because our principle is "primarily to learn".
